The Company

**Allied Nippon
Braking**

ALLIED NIPPON, a QS9000/TS16949 Company, Manufactures disc brake pads in joint venture with Japan Brake Industrial Co. Ltd., Tokyo, Japan. The production of Friction Materials is based on absorption of technology, in-house product development and testing facilities, with a range of formulations to suit different performance requirements.

Japanese Joint Venture

Japan Brake Industrial Co. Ltd. belonging to Hitachi Group is a major supplier to the world's leading automobile manufacturers including Honda, Suzuki, Mazda, Fuji, Nissan, Yamaha, Kawasaki, Hyundai, General Motors, Ford and Chrysler among others.

Manufacturing & Technology

ALLIED NIPPON disc brake pads are manufactured with technology that is regularly upgraded to suit manufacturing and process requirements compatible with performance standards of friction materials worldwide. The production and processing are monitored by experienced and skilled personnel.

Several formulations in asbestos free (both organic and inorganic-semi-metallic) are available for manufacturing friction materials. ALLIED NIPPON is now progressively concentrating on manufacturing eco-friendly asbestos free friction materials compatible with world standards.

The formulations are tested and approved for edge coding per AMECA (Automotive Manufacturers Equipment Compliance Agency, Inc.) standards of USA. Allied Nippon disc brake pads are tested under ECE R-90 Regulation by TÜV, Germany, IDIADA Spain and VCA UK, and are being approved for E-mark — the mark of safety and guarantee of consistent quality.

ALLIED NIPPON friction material products are designed for and consistently guarantee complete safety, strength, high endurance, dependable and cost effective performance — backed by worldwide product liability cover.

As an OEM supplier of friction materials, ALLIED NIPPON continually invests in product development and research activities for application specific material formulations.

ALLIED NIPPON is a major supplier to brake system and vehicle manufacturers.

Both tooling and back plate design and manufacture are carried out in-house using state of the art software and machinery. Allied Nippon consistently meets the stringent requirements for the development of new market components demanded by its international customer base.

R & D Quality Assurance

ALLIED NIPPON friction materials pass through systematically defined Quality Assurance testing procedures and programmes — a rigorous selection process for incoming raw materials, zero defects in processing systems and quality control checks at every stage.

ALLIED NIPPON R&D challenges excellence everyday to improve material composition with on going research in its quest for better materials and consequently better products.

The Company

Allied Nippon
Braking

ALLIED NIPPON brings to you the best of both Japanese and European technology. ECE R90 E-mark certified brake pads with performance characteristics that conform to within $\pm 15\%$ of the OE performance specifications are now available for a wide range of passenger cars and LCV's on European roads.

The Company

**Allied Nippon
Braking**

The Quality Management System of
ALLIED NIPPON LIMITED
has been assessed and approved against the following quality
assurance management systems standards

ISO/TS649 : 1994

QS 9000 : 1998

in accordance with the requirements of
QS 9000 Appendix B, Code of Practice
and the requirements of
ISO 9002 : 1994

The Quality Management System is applicable to
Manufacture and Supply of Friction Products
including Brake Linings, Bonded Brake Shoes,
Clutch Facings, Clutch Plates and Disc Brake Pads for
Automotive and Industrial applications

ALLIED NIPPON LIMITED
is also approved against the international
environmental standard EN14001
as part of its commitment to
low environmental impact production

Important Points

**Allied Nippon
Braking**

1. Since car manufacturers have the right to modify without notice the names and characteristics of their products, Allied Nippon cannot, in any event, be held responsible for the accuracy of the information contained in this catalogue.

Every effort has been made to ensure that information contained in this catalogue is accurate and easily understood. However, Allied Nippon cannot accept any liability for errors, omissions and losses arising from them. Other manufacturers name and part numbers are used for reference purpose only and their use does not imply any connection with Allied Nippon product.

2. The translation or reproduction, even partial, of material in this catalogue, as well as the use of the part codification system, is forbidden without the prior written authorization of Allied Nippon.
3. Allied Nippon wish to draw your attention to the fact that while some of our brake pads can appear to be interchangeable they, in fact, have different technical characteristics. Allied Nippon ask you, as a result, not to modify components nor to force their assembly if there are problems but to consult our Engineering Development Department for advice.

We disclaim responsibility in case of incorrect use or defective assembly or if our Engineering Development Department has not confirmed the reference and applications indicated.

4. References in this catalogue are for identification only. Parts shall be supplied as per Allied Nippon standard product at the time of ordering.

General Terms and Conditions of Sale

**Allied Nippon
Braking**

1. Product Description

Automotive Components - Disc Brake Pads in Asbestos Free Composition.

2. Price

FOB, C&F or CIF in US Dollars or Stg. Pounds or any other mutually agreed currency.

3. Lead Time

- i) Ex-factory : 4 – 6 weeks from the date of acceptance of order.
- ii) Ex London warehouse : Immediate, depending on availability of stocks.

4. Packing (Disk brake pads)

- Each set shrink wrapped is packed into Allied Nippon Asbestos Free Mono Cartons.
- These are further packed in unprinted strong corrugated Master cartons.
- The Master cartons are then palletised and wrapped with stretch film.
- Pallets are strapped and shipped in 20 ft containers. (approx. 12,500 sets Disc Brake Pads are supplied in a 20 ft. container.)

5. MARKINGS (Disk brake pads)

- On the back plate of Disk brake pad e.g.
(Composition) NAM-80
(Batch Code) 05/'00
On the back plate of e-marked brake pads
(E-mark no.) E4 90R-01117/222
(Composition) NAM 118
(Batch Code) 31/'00
- Mono carton - White label containing part number and any other interchange references.
For e-marked brake pads the label will contain part no, brake pad illustration, application details. E-Mark no., batch code etc as required under ECE 90 regulation.
- Master carton - Part number and number of sets packed into Master carton
- Pallet - Pallet Number, Destination, Consignee's name and Allied Nippon name.

6. Product Liability Insurance

Allied Nippon Friction Material Products are backed by worldwide product liability cover.

7. Part Number Identification

8. Brake Pad Illustrations

Drawings shown in the catalogue are not to full scale, but representative indication only.

Above logo represents Allied Nippon products, Unauthorised use is not permissible and for any violation, the company will take legal action.
